ULTIMATE SEAL® Custom Beehive, Swedish Steel Frame, Nickel with Smoked Glass

Full View Fireplace Door with 24 Carat Gold Plating

Custom Corner Door

THE ULTIMATE SEAL®

Air Tight Fireplace Door

Advanced Technology with Proven Reliability at a Competitive Price

Eliminate cold drafts and gain control of your fireplace with the ULTIMATE SEAL® air tight fireplace door. Our enclosure utilizes a dual gasket system to seal your fireplace from the home. Each glass panel is supported internally by a continual fiberglass gasket that allows for thermo-expansion during operation. To guarantee a soft compressible seal around the door perimeters, a braided gasket is used for maximum durability. The cam activated latch mechanisms assure a locked fit and will keep the door closed even when a heavy log rolls against the glass. Adjustable factory mounting hardware enables you to upgrade any existing masonry fireplace with an ULTIMATE SEAL® air tight fireplace door.

The "Clear View" Combustion Air Inlet

The "Clear View" is a unique, adjustable combustion air inlet for fireplaces that have not been ducted for outside combustion air. One innovative adjustment controls both the burning rate of the fire and the air wash to the glass panels. When the burning rate is decreased a greater volume of air is diverted across the glass panels. This creates a barrier of air that virtually eliminates the smoke accumulation on the glass panels.

STANDARD FEATURES

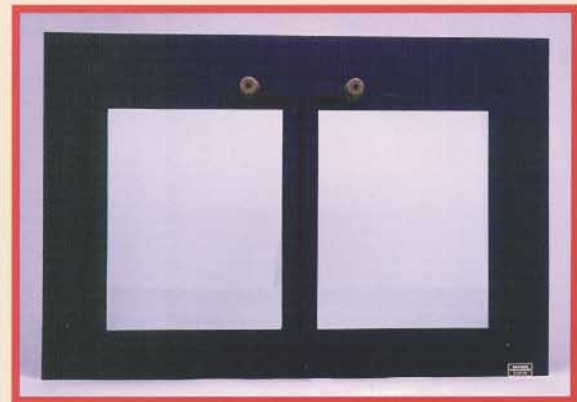

Rectangular flush mount frame, heat resistant black finish, 1/4" tempered safety glass, heat resistant gasket seals, and all mounting hardware.

OPTIONAL FEATURES

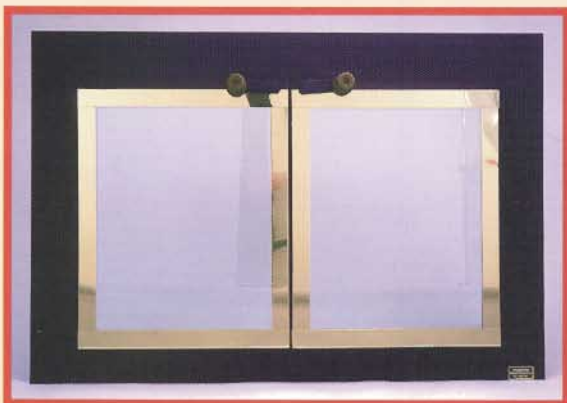

Polished or antique solid brass trim, swinging or sliding fire screen, smoked or ceramic glass, "clear view" combustion air inlet, raised arch metal face frame, arched glass and face frame, recessed mounting, 24 carat gold or nickel plating, Swedish, brushed or hammered steel.

STOCK SIZE ULTIMATE SEAL® DOORS ARE DESIGNED TO FIT THE FOLLOWING MASONRY OPENINGS:

- Model #3027, #3527, and #4127 will accommodate opening heights of 22-3/4" to 26-1/2" tall.
- Model #3027 fits 23-1/2" to 28" wide.
- Model #3527 fits 28" to 33-1/2" wide.
- Model #4127 fits 33" to 39" wide.
- Model #4130 fits 33" to 39" wide by 25-1/4" to 29" tall.
- Model #4431 fits 35" to 42" wide and 25-1/4" to 30" tall.
- Model #4829 fits 40" to 46" wide and 25-1/4" to 28-1/2" tall.
- Model #A-4127 fits 33" to 39" wide and the center of the arch must be 26-1/2" to 28" in height.
- Model #BH36 fits 36" wide by 26-1/2" tall.

Stock Size Door - Black

Stock Size Door - Polished Brass Trim

Each stock size ULTIMATE SEAL® Door features a rectangular flush mount frame, "Clear View" combustion air inlet, fire screen*, and is standard with a black finish. Solid antique or polished brass trim** is available as an overlay on the swinging sections. Complete mounting hardware is included in each package.

* Fire screen is an option on the A-4127 and BH36

** Brass trim is not available on the A-4127 and BH36

THE FULL VIEW

Sealed Fireplace Door

Nickel Plated Version

The Full View, sealed fireplace door, will compliment any fireplace with its elegant style and eliminate excess air loss from the home.

Each door is custom built to retain the maximum viewing area for the fire. Unlike typical sealed glass door assemblies the Full View retains the effect of your open fireplace by eliminating unnecessary center styles that detract from your fire viewing enjoyment.

Perimeter seals surrounding each glass section minimize air flow from the home by creating a compressed fit between the swinging sections and the frame of the door. This will minimize air flow from the home through the fireplace.

STANDARD FEATURES

Gasket sealed perimeter glass sections, a combustion air inlet that creates an air wash of the glass to maintain a full view of the fire, tempered safety glass, and a high heat black finish with an overlap fit.

OPTIONAL FEATURES

Sliding or swinging screens, tinted or ceramic glass, arched glass sections and frames for arched openings, recessed mounting, electroplated finishes in 24 carat gold or nickel, Swedish steel, hammered steel, or brushed steel finishes.
